## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 60-78 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over McKenzie (5,076,867).

McKenzie discloses a water-in-oil emulsion that is formed by mixing nitrite, oxidizer salt, and thiourea and subsequently adding this solution to the emulsifier and the fuel (see col. 4, lines 30-68). PIBSA is disclosed as the surfactant. The amounts of each component are indicated in col. 2 and 3. Col. 4, lines 44-50 also indicates that microballoons can be used in addition to the thiourea/nitrite combination.

Alternatively, It would have been obvious to one having ordinary skill in the art at the time the invention was made to vary the parameters of the emulsion such as pH, amounts and density to achieve a desired result. It is well-settled that optimizing a result effective variable is well within the expected ability of a person of ordinary skill in the subject art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980), In re Aller,

220 F.2d 454, 105 USPQ 233 (CCPA 1955). Further, it would have been obvious to vary the order of the steps of addition of gasser solution to the emulsion explosive. See *In re Burhans*, 154 F.2d 690, 69 USPQ 330 (CCPA 1946) (selection of any order of performing process steps is prima facie obvious in the absence of new or unexpected results) and *In re Gibson*, 39 F.2d 975, 5 USPQ 230 (CCPA 1930) (Selection of any order of mixing ingredients is prima facie obvious). See MPEP 2144.04(IV)(C).

### ***Response to Arguments***

4. Applicant's arguments have been fully considered but they are not persuasive.

Applicants' arguments that McKenzie is not the same type of emulsion as that of the instant invention are unpersuasive. First, McKenzie does disclose the mixing steps and also uses PIBSA, further note that the amounts and use of microballoons is disclosed. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Also, note that the claim scope is "comprising" and allows for additional features.

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
